REPORTED DIET & TRAINING NOTES · JASON MOMOA

Fuel, Don't Count

The no-calorie-counting, injury-proofing approach of a big-man action star

SOURCED FROM PUBLISHED INTERVIEWS · NOT AFFILIATED OR ENDORSED

BEFORE YOU BEGIN

About this ebook

Jason Momoa's take on diet is refreshingly unfussy: he says he doesn't count calories at all. What he does care about is staying strong enough to move in a heavy costume — and avoiding injury.

This ebook is an independent summary of publicly available interviews and articles. It is not affiliated with, authorised or endorsed by Jason Momoa, their trainers, representatives, or any film studio. Names are used only to identify whose publicly reported routine is being described. Every reported fact is paraphrased and numbered to its source on the final page. Sections marked **Valtair adaptation** are our own general suggestions, not the celebrity's plan. This is general information, not medical, nutritional or dermatological advice — check with a qualified professional before changing your diet, training or skincare, especially if you are pregnant, take medication or have a health condition.

CHAPTER 1

What was reported

1. Momoa told E! News he eats 'everything' and doesn't focus on calories: 'I just shovel it in, and then work hard.'[1]
2. He explained he eats heavily on set because he burns a lot of energy there.[1]
3. His character's suit reportedly weighs about 40 pounds, so staying fit enough to move in it was the goal.[1]
4. He said his training is not about vanity but about avoiding injury, particularly to his knees.[1]
5. Unlike some co-stars, he said he didn't have to cut weight for the 2023 sequel: 'I didn't have to get like they had to get.'[1]

CHAPTER 2

A reported day

No complete daily menu has been published in the sources we used — so we are not inventing one. Below are the reported building blocks and training notes.

Momoa has not published a menu — this ebook is about his stated approach, not a meal list.

TRAINING NOTES

- Performance-first: train to be capable and injury-resistant.
- He has spoken about a hernia surgery after an on-set injury — recovery matters.

CHAPTER 3

The principles

Strip away the film budget, private chefs and trainers, and the reported approach comes down to a handful of repeatable rules. These are our plain-English take on them:

VALTAIR ADAPTATION

- Walk 8,000–12,000 steps a day — build up slowly.
- Same simple breakfast most days to remove decisions.
- Protein + vegetables at lunch and dinner.
- Fixed bedtime; aim for 7–9 hours of sleep.

PORTION GUIDE (HAND METHOD)

FOOD	PER MEAL
Protein	1–2 palms
Vegetables	1–2 fists
Carbs	1–2 cupped hands
Fats	1–2 thumbs

Smaller or less active? Use the lower number. Larger or training hard? The higher one.

Your 7-day plan

An original, everyday-budget week inspired by the principles — **not** the celebrity's actual menu. Indian-kitchen friendly; swap freely.

Style: Simple routine week (steps + whole food)

	MORNING	MIDDAY	EVENING
Day 1	Eggs + fruit + toast	Chicken / dal + rice + veg	Paneer / fish + sabzi + roti
Day 2	Eggs + fruit + toast	Rajma + rice + salad	Grilled chicken + veg
Day 3	Eggs + fruit + toast	Chole + 1 bhatura-free roti + salad	Fish curry + rice
Day 4	Eggs + fruit + toast	Chicken wrap + curd	Dal khichdi + veg
Day 5	Eggs + fruit + toast	Paneer bowl + quinoa	Soya / tofu stir-fry
Day 6	Eggs + fruit + toast	Home thali (dal, sabzi, roti, curd)	Grilled fish + salad
Day 7	Relaxed breakfast	Family meal	Light soup + protein

Add vegetables generously. Vegetarian? Use paneer, tofu, soya, dal and curd for protein.

CHAPTER 5

Shopping list

One week, one shop. Tick as you go.

PROTEIN

- [ ] Eggs
- [ ] Chicken breast / fish
- [ ] Paneer / tofu
- [ ] Greek yoghurt / curd
- [ ] Moong dal / chana / rajma
- [ ] Whey (optional)

CARBS

- [ ] Oats
- [ ] Brown / red rice
- [ ] Multigrain atta
- [ ] Sweet potato
- [ ] Fruit (banana, apple, berries)

VEG & FATS

- [ ] Spinach / greens
- [ ] Broccoli / beans
- [ ] Cucumber / tomato
- [ ] Nuts & seeds
- [ ] Cold-pressed oil (measure it)

PREP IN 60 MINUTES (SUNDAY)

- Cook a big pot of rice or quinoa and one dal.
- Grill or bake 1 kg of protein; portion into boxes.
- Wash and chop vegetables for 3 days.
- Portion nuts and snacks into small bags.

CHAPTER 6

Read this first: cautions

- 'Not counting' works when you're very active and listening to hunger cues; if you're less active, a little structure helps.
- This approach is about eating enough — not eating anything in unlimited amounts.
- Celebrity transformations are short-term, supervised and often timed to a shoot. Sustainable progress is slower — and that is normal.
- Stop and see a doctor if you feel faint, unwell, or your relationship with food starts to feel stressful.

4-week tracker

Count the days per week you managed each habit (0–7).

HABIT	W1	W2	W3	W4
Hit protein at every meal				
Ate mostly whole foods				
Drank 2–3 L water				
Trained / walked				
Slept 7+ hours				
Weekly weigh-in / photo				

NOTES

Sources

All reported facts in this ebook were paraphrased from the following publicly available articles. Quotes are short and attributed. Read the originals for full context.
